GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Dear Ms. Wilson,

I am mailing to you today the completed filings. There were two filings under S000127: one for Peyton Creek and one for McFarland Creek. I have completed both, and they are enclosed in the package. I hope I have done this correctly. Also enclosed, in addition to completed supplemental statements S000124 through S000129, are the two notices of assignment signed by Patricia Wenn. Thank you for your help on this.

Best regards,

Subject: Requested Supplemental Statements of Diversion and Use

Mr. Eddy:

I am mailing you the requested supplemental statements S000124 through S000129 for the reporting years 2002-2004. S000127 does indeed have two sources, Peyton Creek and McFarland Creek. We have no record of use for McFarland Creek. I am also enclosing a (First) Statement of Diversion and Use for McFarland Creek. A separate statement should have been filed for each source. Please complete the form and return it with the supplemental statements and I will process and assign an ID number for McFarland Creek.

I also have enclosed the original statements for S000122 and S000123 for the property you recently purchased, along with two notices of assignment for the ownership change on these two statements. The supplemental statements for these were last sent to the old owner in 2004 for the reporting years of 2001-2003. When I receive the ownership assignments, I will make the changes to our records and these two statements will be included in your next filing in 2008.

Should you have further questions, please either call me at (916) 341-5315, or email me at swilson@waterboards.ca.gov
